SUMMARY

Detail-oriented Software Engineer with 4+ years of professional experience in full-stack web and desktop application development. Proficient in React.js, Python, and C# (WPF), with a strong background in building scalable front-end architectures, integrating robust APIs, and developing enterprise-level applications. Currently working at NYBL on innovative forecasting and control solutions, with prior experience leading and developing projects at Maavan and Slectus.

EDUCATION

UNIVERSITY OF KARACHI — Karachi,PK
Bachelor of Science(BSCS) — 2016-2020
Major in Computer Science
Cumulative GPA: 3.2/4.0
Relevant Coursework: OOP, Data Analysis, Software Engineering, Operating Systems, Algorithms;

Govt. Dehli College — Karachi, PK
Completed my Pre-Engineering — 2013 - Jul 2015

WORK EXPERIENCE

NYBL (Remote) — Dubai, UAE
Software Engineer — Aug 2025 – Present

- Working on the **SEC Project**, building scalable enterprise desktop solutions using **C# and WPF**.
- Previously contributed to the **Demand Forecasting** project, developing data-driven features with **React and Python**.
- Initially worked on **Nubyla**, handling frontend tasks and Python backend integrations.

Maavan (Remote) — San Jose, CA
Senior Software Development Engineer (SDE) — Mar 2021 – Aug 2025

- Joined via Know.Careers project, then transitioned full-time to NYBL as an embedded resource.
- Improved website performance by 75% through frontend optimization in **React, Redux, and MUI**.
- Led frontend development team for NYBL, delivering 5+ major features that increased stakeholder satisfaction.
- Reduced bug count by 70% via legacy code refactor, significantly cutting support tickets.
- Integrated Python backend services, enhancing system performance and reliability.
- Contributed to internal WPF-based desktop tools using **C#**, improving internal operations.

Slectus (Remote) — New York, NY
MERN stack developer — Jan 2020– Dec 2020

- React, Redux, and Material-UI. • Produced websites compatible with multiple browsers. • Created an eye-catching and cross-platform Web Application. • Modern Ui design on Figma • Built a chat system based on Firebase
- Debugged and resolved 95% of front-end issues, resulting in a 30% decrease in user-reported bugs and enhancing overall user experience.
- Developed a RESTful API using NodeJS, resulting in a 20% increase in server response time, improving overall system performance and user experience.
- Implemented RESTful API endpoints for data retrieval and manipulation, enhancing system scalability and improving overall performance.

UNIVERSITY PROJECTS

Blockchain-Based Mobile Election System (FYP)

- **NIC Validation:** Verifies the voter's National Identity Card (NIC) information with the government database.
- **Fingerprint Authentication:** Performs a fingerprint scan (takes a picture of the fingerprint) to confirm the voter's identity.
- **Mobile Voting:** Allows users to cast their vote directly through the mobile application.
- **Blockchain Security:** Securely stores votes on the blockchain, ensuring transparency and preventing tampering.

Hand Gesture Control Car

- **Wireless Communication:** Implemented TX/RX receivers for wireless control of the car.
- **Arduino Lilypad Integration**: Used an Arduino Lilypad attached to gloves for gesture detection.
- **User Interaction:** The user wears gloves with the Arduino board attached, allowing them to control the car by moving their hand.

ADDITIONAL

Languages & Frameworks: JavaScript, React.js, Redux, Python, Node.js, C#, .NET, WPF, TailwindCSS, MUI
Web & App Development: REST API, React Native, HTML, CSS, Bootstrap, Material-UI, Firebase
Design & Tools: Figma, Framer Motion, GSAP, Three.js, GIT
Databases: MySQL, Supabase, Firebase, MongoDB
Other: Blockchain, Site Migration, Debugging, State Management, Agile Development
Languages: English (IELTS 6.5), Urdu

CERTIFICATION

React Nanodegree **– Udacity**
